## BusinessBeats.ai Launches High-End B2B AI Music Platform

**BusinessBeats.ai officially launches its innovative B2B music platform, offering customized wait music, jingles, sonic branding, and podcast intros for companies.**

**DENTERGEM, BELGIUM, June 1, 2026** — BusinessBeats.ai, a high-end service owned by Printasy BV, has officially announced the launch of its AI-driven B2B music platform. The service allows companies to create highly professional, unique, and royalty-free brand music, including custom waiting music, jingles, sonic logos, podcast intros/outros, and background music for product videos within days.

Modern branding requires a distinct audio identity. Traditional licensing is expensive and complex, while stock music sounds generic. BusinessBeats.ai bridges this gap by using state-of-the-art AI technology to generate tailored tracks that align perfectly with a brand's personality, tone, and audience. Each track is delivered with a complete commercial usage license, ensuring peace of mind for businesses.

### A NEW SOUND FOR MODERN BUSINESSES

*"Our goal is to make audio branding accessible and affordable for businesses of all sizes," said the founder at Printasy BV. "With BusinessBeats.ai, a real estate office, tech startup, or local store can have a professional, cohesive sonic identity in a matter of days rather than weeks or months. By visiting our parent site at [printasy.com](https://printasy.com), users can see our commitment to digital innovation and B2B solutions."*

— FOUNDER, PRINTASY BV

The platform features a streamlined order process, clear pricing packages (Starter, Business, and Campaign), and custom feedback rounds to guarantee satisfaction. All audio is delivered in professional WAV and MP3 formats ready for integration into telephone exchanges, video editors, and podcast hosts.
